

Reinforced Silicone Sheeting

Calendered reinforced silicone sheeting with impregnated glass cloth, supplied in cured and uncured form. (Glass cloth sandwiched between two layers of silicone.)

Material Description

Heat and weather resistant solid silicone rubber reinforced with glass cloth manufactured to meet AMS-3320F specification.

Property	Test Value	Test Method
Colour	RED (R.I.O.)	
Tensile Strength (PPI)	12.7	
Hardness	300	ASTM D-751
Compression Set 22 Hours @ 175°C	65° Shore	ASTM D-2240
Temperature Range	50%	ASTM D-395/B
Hardness	-54°C TO 200°C	

Temperature Range Can Be Extended For Short Duration.

Sheet Width: 1m.

Sheet Thickness: 1.6mm And 3.2mm ± 0.15mm.
